

LUMINIZER OEM

Building blocks to add to your own light management application

Boost your own application to meet the specific needs of customers or tenders. Modular, turnkey bundles to add seamlessly to your existing framework.

- Add functional modules with usage based pricing ('pay as you go')
- Provided 'as a service' in your own branding
- Modules are readily available can be applied at short notice
- No need to spend time and money on in-house software development

Add modules

Qualify for more deals

Manage more assets

Increase revenue

Example modules to add and to qualify for more deals:

CLMS

Central Light Management System

- Control of third-party smart lights
- Uniform device handling of multiple technologies
- Standardized status reporting across vendor systems
- Traffic-based lighting control
- Street cabinet control
- Emergency panel for security staff
- Automatic creation of work orders

Workflow

Operations and Asset Management

- Central work order management system
- Manage non-connected streetlights
- Manage cable grid and ancillary assets
- Show the real-time status of each repair job
- Coordinate office and field work
- Public web portal for malfunction reporting

Luminext has been a streetlight management specialist since 2007. Over 1 million assets are being managed on our platform, with more than 500 thousand work orders processed.
